Along the path · YSpec documentation shear packet · L=200
T velocity, 1000–1200 s, 2–10 mHz · bulk section difference 0.00224%

All three panels share one colour scale. Limits: combined 99th percentile below 150 km depth; along path excludes 5° near endpoints.
Colours interpolate within native SEM elements; clipping affects display only. Radius ≥ 3000 km. No degree-convergence claim.
